TUFF POST is a sealed unit made entirely from stainless steel. Designed to be submerged into garden beds, water and other mediums. **TUFF POST** is used in conjunction with a SafetyLink lifeline or energy absorbing eyebolt system.

- **TUFF POST 300** raises system 300mm off the ground.
- **TUFF POST 600** raises system 600mm off the ground.
- **TUFF POST** can be used with the FrogLine Lifeline or energy absorbing Abseil Eyebolt.
- Suits positions like garden beds on roof tops.

Benefits of choosing SafetyLink:

SafetyLink's **TUFF POST** is designed to raise the height of a height safety system, we have two sizes to choose from either 300mm **TUFF POST** or 600mm **TUFF POST**.

The **TUFF POST** can be used in conjunction with a horizontal lifeline or individual roof anchor.

The **TUFF POST** when installed with a lifeline is used with SafetyLink's energy absorbing FrogLine Lifeline. The FrogLine Lifeline has advanced shock absorbing serpentine designed into each anchor with innovative built-in fall indicators. Therefore reducing the load off the structure and the person in the event of a fall.

When installing the **TUFF POST** as an individual anchor SafetyLink's RetroLink is installed onto the **TUFF POST** creating a fall arrest / rope access anchor.

Load Testing **TUFF POST 300 or 600**

SafetyLink will provide you with the following:

- All products tested and manufactured to Australian and New Zealand Standards.
- All distributors and installers are trained to use SafetyLink products.
- Supply installation guides, testing results and product sheets.
- Layout Design Service providing compliant roof safety systems.
- Supply a large range of roof anchors that protect you from the ground up, allowing complete access to your roof.
- Installers are qualified to do yearly inspections on your anchors as per Australian and New Zealand Standards.
