

HORIZONTAL LIFELINE

FrogLine Steel Mounted Lifeline

The FrogLine Steel Mounted System is a horizontal lifeline installed into steel construction. The system is equipped with SafetyLink's engineered energy absorbing intermediate and end anchors to minimise loads on both the user and structure in the event of a fall. The continuous connection via the Overhead Shuttle System on the 8mm stainless steel cable provides protection for up to four (4) users per system, two (2) users per span.

The intermediate anchor limits the lifeline span distances, the end anchor attachment points are designed for the cable to start and terminate at and the corner unit is designed for the cable to run through the corner anchor re-directing it by up to 90 degrees.

STANDARDS

The FrogLine has been tested and manufactured in accordance with AS/NZS 1891.2, ANSI Z359.6-2009, EN 795:2012, CEN/TS 16415:2013 and OSHA 1926.502.
