ROPE GUIDE BRACKET

Product Code: LADFX007

- Guides and protects your ropes from being damaged when abseiling over a sharp edge or gutter.
- Protects the guttering systems from rope pressure and damage.
- Easy to install and non-obtrusive, can be permanently installed or removed after use.
- One person use.

WHAT AM I USED FOR?

Made from marine grade aluminium the rope guide bracket is designed to guide a user's rope over the building and protect them from any sharp edges. SafetyLink's Rope Guide Bracket is uniquely designed to mimic the protective properties of our patented Fixed LadderLink. Using the Rope Guide Bracket will prevent rope damage when abseiling over sharp edges or guttering systems. Conversely the bracket will prevent damage to the gutter when in use, expertly guiding the rope's exactly where you want them.

The Rope Guide Bracket has two collared eyebolts attached, these are not to be used as load rated anchors in any situation. The collared eyebolts are present to ensure that the abseil ropes will stay in the desired location and do not slip from the bracket. It is recommended that a strap be used between the collared eyebolts to secure the abseil ropes, so they cannot unintentionally leave the Rope Guide Bracket.

- ⚠ Adjusting the pitch of the LadderLink is to be done by a sheet metal fabricators' bending machine. LadderLink is made from high tensile aluminium therefore ensure the bender is set on a high radius to prevent cracking.
- ⚠ Protective coating must not be removed.

COMPLETE UNIT - PRODUCT CODE: LADFX007

Product Parts	Description	Qty	Weight (kg)	Material
LADFX007	Ladderlink: Rope Guide Bracket	1	3.415	Marine Grade Aluminium
