

RETROLINK - Abseiling/Fall Arrest Purlin Mounted Anchor

- ▲ The SafetyLink Patented RetroLink can be installed onto a metal C or Z purlins, where no access is available from underneath the roof. Fits in the pan of the roof sheeting.
- ▲ The anchor is an abseiling and fall arrest anchor with an unobtrusive design that requires no special tooling and minimal penetration to the roof sheeting.
- ▲ Installation is a simple process requiring one hole to be drilled into the roof sheeting and through the purlin, a waterproofing washer combined with an o ring seals the hole.
- ▲ The SafetyLink Retro Eyebolt is designed to bend like a fishing pole reducing the load back on the structure and the person attached to the anchor.
