

The FrogLine Wall Mounted System is a wall mounted horizontal lifeline installed into concrete construction. The system is equipped with SafetyLink's engineered energy absorbing intermediate and end anchors to minimise loads on both the user and structure in the event of a fall. The continuous connection via the Overhead Shuttle System on the 8mm stainless steel cable provides protection for up to four (4) users per system, two (2) users per span.

STANDARDS - The FrogLine has been tested and manufactured in accordance with AS/NZS 1891.2, ANSI Z359.6-2009, EN 795:2012 and CEN/TS 16415:2013.
