SteelLink Blind Fastener

The SteelLink blind fastener is designed for anchoring to all structural steel with or without access to concealed areas.

SafetyLink's team have designed a fastener that will access where no other fastener can, with the ease and strength of the SteelLink Blind Fastener.

SafetyLink's SteelLink Blind Fastener is a rated fastener for installation into structural steel hollow sections or steel structures with a thickness between 3-10mm.

The SteelLink Blind Fastener is suitable for use with all SafetyLink fall protection systems.

The SteelLink Blind Fastener is a revolutionary product.

- 🔑 Suits a multitude of M12 fasteners.
- 🔑 Anchors with a single 18mm hole.
- 🔑 Rated to 22kN.

SafetyLink will provide you with the following:

- 🔑 All products tested and manufactured to current Standards.
- 🔑 All distributors and installers are trained to use SafetyLink products.
- 🔑 Supply installation guides, testing results and product sheets.
- 🔑 Layout Design Service providing compliant roof safety systems.
- 🔑 Supply a large range of roof anchors that protect you from the ground up, allowing complete access to your roof.
- 🔑 Installers are qualified to do yearly inspections on your anchors as per the current Standards.
