SafetyLinks stainless steel surface-mounted FrogLink has set the new benchmark in the field of height safety.

This revolutionary all in one unit has been designed to attached to all metal profiles with a single row of attachment holes. This unique configuration makes it a fast simple unit for installation.

Its low profile reflective design is a plus for many commercial or residential enterprises wanting to maintain an aesthetically pleasing facade.

The FrogLink doesn't just look good, it's dynamic design reduces the load back onto the structure and person attached to the anchor.

SafetyLink's roof anchors are multi-directional. A fall is never an anticipated event when working at heights, therefore the direction of your fall cannot be accurately predicted. All SafetyLink roof anchors are designed and tested as multi-directional.

Benefits of choosing SafetyLink:

SafetyLink's unique designed roof anchors provide fall restraint and fall arrest safety for residential, commercial and industrial buildings. Our roof anchors have patented designs which absorb energy, which means if in the event of a fall the anchor absorbs energy therefore reducing risk of injury to the person and damage to the structure.

SafetyLink's designs represent a perfect engineered solution for working at heights and roof safety fall protection.

- ▲ Fast simplified installation.
- ▲ Multi-directional fall protection.
- ▲ Single person anchors.
- ▲ Rated at 15kN.

SafetyLink will provide you with the following:

- ▲ All products tested and manufactured to current Standards.
- ▲ All distributors and installers are trained to use SafetyLink products.
- ▲ Supply installation guides, testing results and product sheets.
- ▲ Layout Design Service providing compliant roof safety systems.
- ▲ Supply a large range of roof anchors that protect you from the ground up, allowing complete access to your roof.
- ▲ Installers are qualified to do yearly inspections on your anchors as per Standard.
