SafetyLink Modular Systems are a modular access system for permanent installation in a wide variety of scenarios. SafetyLink Modular Systems are design to and when installed in accordance with this manual are compliant with AS 1657:2018.

Determining the best location for your access system can be difficult. SafetyLink recommends a risk assessment be conducted to accurately assess the key hazards of your particular work area. Hazards include but are not limited to; ingress and egress from the access system, machinery and vehicles use in the area, electrical conductivity and chemical agents.
