

- ▲ Minimises potential waterproofing issues by mounting to a wall of the garden bed instead of the base.
- ▲ Suitable for structural concrete fixing with a minimum of 150mm thickness and 150mm edge distance.
- ▲ Innovative design enables the safety system to be loaded both adjacent and across the concrete surface.
- ▲ TUFF-BRACKET Anchors can be used for Fall Arrest and Rope Access/Abseiling.
- ▲ Must install with chemical adhesive.

The building or structure for the anchorages must be assessed by an engineer, unless it is clear to a competent height safety installer that the structure is adequate. Refer to system information for site specific use.
