SafetyLink®

Innovative
Fall Protection

SafetyLink's individual ladder pieces join together with an outer coupling channel that is placed over the top of the inner channel and riveted into place.

- ❑ Ergonomically designed rungs for maximum grip at all angles.
- ❑ Swaged rungs for extra strength and reliability.
- ❑ Heavy gauge aluminium for superior strength.
- ❑ Fixing brackets designed for utmost strength and versatility.

Benefits of choosing SafetyLink:

SafetyLink's swaged rungs are made from heavy gauge aluminium for added strength and reliability to comply with AS 1657 performance requirements. All rungs are ergonomically designed for maximum grip at all angles and spaced consistently at 300mm apart.

Assembling the SafetyLink Permanent Ladder System is a simple exercise with SafetyLink's comprehensive installation guides. The individual ladder pieces join together with an outer coupling channel that is placed over the top of the inner channel and pop riveted into place.

SafetyLink's roof anchors are multi-directional. A fall is never an anticipated event when working at heights, therefore the direction of your fall cannot be accurately predicted. All SafetyLink roof anchors are designed and tested as multi-directional.

SafetyLink will provide you with the following:

- ❑ All products tested and manufactured to Australian and New Zealand Standards.
- ❑ All distributors and installers are trained to use SafetyLink products.
- ❑ Supply installation guides, testing results and product sheets.
- ❑ Use a qualified and reputable testing authority.
- ❑ Supply a large range of roof anchors that protect you from the ground up, allowing complete access to your roof.
- ❑ Installers are qualified to do yearly inspections on your anchors as per Australian and New Zealand Standards.
