Swageless Tensioner

Product Code: STAT.TENSR002
- For use on horizontal lifeline.
- Affords simple installation.
- Suits 8mm cable.
- Stainless steel construction.

Swageless Tensioner with Tension Indicator

Product Code: STAT.TENSR004
- Tension fork indicator.
- For use on horizontal lifeline.
- Compact design for easy installation.
- Pre-Tension indicator disk frees at 800n.
- Suits 8mm cable.
- Stainless steel construction.

Swageless Fork Termination

Product Code: STAT.TERMN002
- Fork terminal.
- For use on horizontal lifeline.
- Affords simple installation.
- Suits 8mm cable.
- Stainless steel construction.

FOR USE ON HORIZONTAL LIFELINES

Make sure that the cable matches the terminal. The SS terminal use only for 8mm 7x7 and 7 x 19 Stainless Wire. Do no reuse jaws or house.

1. Slide the jaw housing in place on the cable.
2. Slide the jaws onto the cable, ensuring there is equal space between the jaws.
3. Place the brass pressure ring on the end of the cable. Make sure that the distance from the pressure ring to the end of the cable is 5-8mm.
4. Slide the jaw housing over the jaws.
5. The terminal can now be assembled. Screw the head on the jaw housing with a torque wrench – min. 58 Nm (43 Lbf ft), Tighten the lock nut with min. 50 Nm (36 Lbf ft).

Note: after the first dynamic load the terminal MUST be tightened again. When assembling Swageless Terminals the breaking strength of the cable will be reduced by 0-15%.

The user is responsible for choosing the proper cable, and for correct assembly.
