DATA SHEET

FS 707302

- ConcreteLink One Piece Unit is a low profile anchor point designed for use in concrete, where the eyebolt will remain in place exposed for attachment.
- The building or structure for the anchorages must be assessed by an engineer, unless it is clear to a competent person that the structure is adequate.
- Must be chemically fastened, recommended chemical is Fischer FIS-V.
- 360° Multi-directional, enabling full rotation around the anchor.
- Eyelet 35mm ID.

STANDARDS

Complies with AS/NZS 1891.4 and AS/NZS 5532-2013.

COMPLETE UNIT - PRODUCT CODE: CONCL005

Product Parts	Description	Qty	Weight (kg)	Material
CONCL005	ConcreteLink One Piece Unit: 100mm, M16	1	0.332	316 Stainless Steel

Testing for concrete mounted anchor.

To comply with current Standards each Concrete unit must be tested after installation. Allow required curing time as specified in manual before testing. Test consists of pull out force to 50% of design load of anchorage. **Note: Drilled-in anchorages such as friction and glued-in anchorages shall be placed so that the shear load is at least twice the tension load. For collared eyebolts this translates to a pull at an angle not exceeding 20 degrees to the surface in which the bolt is installed.**

All products must be installed in accordance with SafetyLink's installation handbook, using only products supplied by SafetyLink Pty Ltd.
